

# JAVA CODING STANDARD

Source-code rules for FRC Java Coding Lab 7.0

| Document | Version | Status | Language |
|----------|---------|--------|----------|
| ES-02    | 1.0     | FROZEN | English  |

**SSIS FRC Team 10951**

Author: SSIS | Mentor: SSIS

## Code Delivery

- Always provide the FULL FILE when creating or modifying Java.
- Do not use diffs, ellipses, or omitted lines.
- Make one clear change per step.

## Headers and Comments

- Preserve the WPILib copyright header at the top.
- Place the Author: SSIS / Mentor: SSIS block immediately before package.
- Use concise technical English comments only.

## Design

- No magic numbers; configuration belongs in Constants.java.
- Do not use deprecated APIs.
- RobotContainer performs composition and wiring only.
- Commands do not access hardware directly.
- Telemetry observes only and never controls.
- IO does not know NetworkTables.

## Naming

- Classes and interfaces use PascalCase.
- Methods and fields use camelCase.
- Constants use lowerCamelCase following the current WPILib project convention.
- Names describe responsibility, not temporary lesson context.

## Dependency Rules

**controls → commands → subsystems → io → hardware**

Telemetry sits beside the control pipeline and receives snapshots only from commands or subsystems.

## Revision History

| Version | Date       | Status | Notes           |
|---------|------------|--------|-----------------|
| 1.0     | 2026-07-18 | FROZEN | Initial release |
