

ENGINEERING STANDARD

Robot Software Development Standards

Document	Version	Status	Language
ES-00	1.0	FROZEN	English

SSIS FRC Team 10951

Author: SSIS | Mentor: SSIS

Purpose

This document standardizes architecture, development workflow, coding rules, and verification for the entire FRC Java Coding Lab 7.0.

Document Set

Document	Role
ES-01 - Frozen Development Workflow	Mandatory workflow for every module.
ES-02 - Coding Standard	Rules for writing and delivering Java code.
ES-03 - Architecture Review Checklist	Pre-implementation architecture checklist.
ES-04 - Lesson and Module Checklist	Implementation and completion checklist.

Frozen Principle

- The Frozen Backbone defines package responsibilities and dependency direction.
- The Frozen Development Workflow defines how every module is developed.
- Do not change the standard during a lesson without a formal architecture review.
- RobotContainer is the composition root and must remain concise.

Standard Flow

**Frozen Backbone → Contract Design → Architecture Review → Full
Implementation → BUILD SUCCESSFUL → Simulation → Real Robot → Git
