

# Drivebase Hardware Map

Project: FRC Java Coding Lab 7.0 – Real Robot Programming

## Drivebase Overview

| Item               | Value         |
|--------------------|---------------|
| Drive Type         | Tank Drive    |
| Motor Controller   | REV SPARK MAX |
| Motor Type         | Brushed CIM   |
| Motor Count        | 4             |
| Power Distribution | REV PDH       |
| Main Controller    | RoboRIO 2     |
| Framework          | WPILib 2026   |

## Drivebase CAN Mapping

| CAN ID | Device    | Role           | Motor     | Notes                            |
|--------|-----------|----------------|-----------|----------------------------------|
| 11     | SPARK MAX | Left Leader    | Left CIM  | Main left drivetrain controller  |
| 8      | SPARK MAX | Left Follower  | Left CIM  | Follows CAN 11                   |
| 10     | SPARK MAX | Right Leader   | Right CIM | Main right drivetrain controller |
| 7      | SPARK MAX | Right Follower | Right CIM | Follows CAN 10                   |

## Leader / Follower

Left: CAN 11 → CAN 8  
Right: CAN 10 → CAN 7

## Controller Mapping

A: Drive Forward (50%)  
B: Drive Reverse (50%)  
Release: Stop
